BurgerDisk Smartport Hard Disk for Apple II

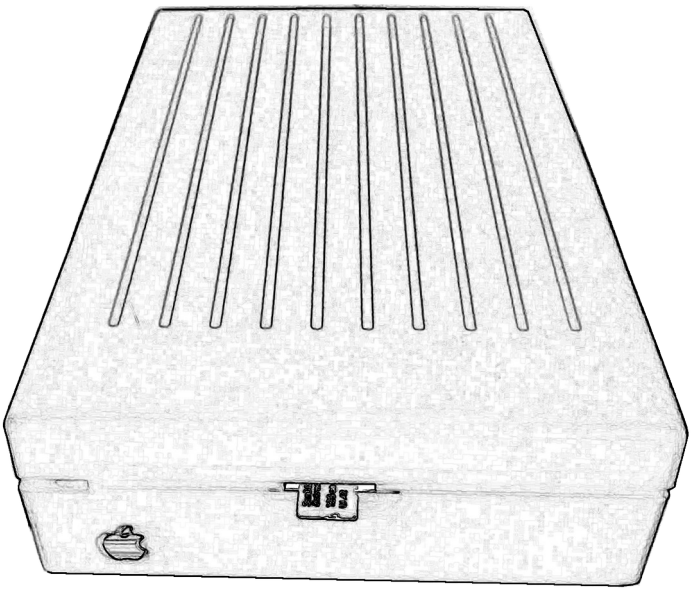
Quickstart

Thank you for getting a BurgerDisk! I hope you will like it.

Quick pointers to start using it:

The User Manual is available at https://www.colino.net/wordpress/wp-content/burgerdisk-user-manual.pdf

Assembly instructions are available at https://github.com/colinleroy/BurgerDisk/tree/main/build_instructions



Your enclosure comes with a 3D-printed Apple logo taped to it. You can either glue it, or remove it and glue a real vintage Apple logo if you have one available.

Have fun!

Kit contents

Small components taped here

R2 150Ω	R1 330Ω	D1 removed	D2 1N4448	D3 1N5818	R4 10kΩ	R5 1kΩ	R3 470Ω
		Errata: D1 was an issue with SoftSP cards.Solder a leg from another component instead.
